

BIOPROTECT SURFACE INDUSTRIAL TREATMENT 20L

Experience the removal and inhibition of hydrogen sulphide and ammonia with our BioProtect Surface Industrial Treatment. This solution not only reduces odours but also creates a safe working environment, minimising complaints and ensuring a healthier community. Hydrogen sulphide and ammonia, known for their corrosive nature, can damage various assets, leading to significant capital expenditure. BioProtect Industrial Treatment safeguards equipment against aggressive gas attacks, reducing maintenance costs, extending equipment life, and saving valuable resources. Unlike masking agents, this treatment targets the root cause (bacteria) of noxious odours.
