

KEMSOL SANI-FOAM CLEANER - 5L

Kemsol Sani-Foam Cleaner 5L is a concentrated foaming cleaner and chlorine-based sanitiser, ideal for food processing and other large-scale cleaning applications. It effectively cleans and sanitises hard surfaces, using a thickened formula that ensures extended contact time for maximum pathogenic control. The cleaner is suitable for manual application or through automatic dilution and foaming devices. For optimal results, it is recommended to use at a dilution ratio of 1:20 to 1:100 depending on the soiling level, with a contact time of 5-10 minutes before rinsing. This product is MPI approved and has passed the AsureQuality assessment for food contact surfaces, ensuring it meets high safety and hygiene standards.
